TEXAS SENATE DISTRICT 23¹
ACS 2010-2014 Estimates

- ¹ Comparisons to the previous district profiles should be made with caution. Previous district profiles were compiled by TLC Research by aggregating census block group data into senate and house districts. Block groups that crossed district lines were counted in the district totals of the district in which more than 50% of the population lived. In the 2010-2014 ACS, the Census Bureau reported data for the most recent Texas house and senate districts.
- ² The ACS data is gathered from surveys distributed to a sample of the population. The margins of error (MOEs) that accompany each of the estimates are available upon request from TLC. The MOE indicates the reliability of these estimates.
- ³ State and district percentages are based on the totals in the general category shown above each group and marked by a gray bar.
- ⁴ This report does not include state and district percentages for the special populations group or the variables that illustrate average or median values. For these variables, the state estimate is provided.
- ⁵ Statistical weights are used to calculate the district estimates.
- ⁶ Individuals who work at home are not included in these categories.
- ⁷ Percentages are based on the population for whom poverty status is determined.
- ⁸ Public assistance income includes Temporary Assistance to Needy Families (TANF) but not SSI or Supplemental Nutrition Assistance Program (SNAP) / food stamps.
- ⁹ Households reporting no income or a negative income (where expenses are more than income) are excluded.
- ¹⁰ Only housing units with tenants paying rent are included in these categories. Rental units with tenants living in them for free or in exchange for services are not included. The percentages of units with no cash rent range from 1% to 22% across senate and house districts.
